

BANKER WIRE RELEASES NEW ARCHITECTURAL CATALOG

Project-Focused Design Serves as an Inspiration for Readers

MUKWONAGO, WI—October 24, 2016—Banker Wire, the world's leading manufacturer of woven wire mesh, announces the release of its new architectural catalog. With a refreshed design, the catalog showcases completed projects to serve as a source of inspiration for those with working with the material.

Featuring stunning project photography, the new catalog exhibits the wide variety of architectural applications available with Banker woven metal mesh. It chronicles the work that Banker has done with the architectural and design communities, spotlighting more than 60 project case studies in a wide variety of functional and aesthetic applications.

"When planning our new catalog, it became clear early-on that the best way to tell the Banker story would be to show the limitless ways in which our product has been used," says Harrison Horan, Vice President of Banker Wire. "We design and manufacture the woven wire mesh material, but it is the collaborative efforts with our clients that makes it shine."

In addition, the new catalog serves as a quick reference guide for woven wire – its make-up, styles, and performance options. As Your Wire Mesh Authority, Banker's catalog is the industry's only handbook for understanding and specifying woven metal mesh.

###

About Banker Wire

Banker Wire is the world's leading manufacturer of woven and welded wire mesh for architectural and industrial applications. With the most modern and productive mill in the U.S., Banker Wire provides custom-woven material for any aesthetic on any scale – from intricate design highlights to expansive building facades. Founded in 1896, Banker Wire's manufacturing expertise has been refined for more than a century, bringing unmatched customization, quality, and service to customers. State-of-the-art grid welding equipment provide a wide variety of wire alloy, spacing and diameter configurations, trimmed or untrimmed. For more information visit www.bankerwire.com.

About Architectural Woven Wire Mesh

Pre-crimped woven wire mesh is constructed of individual wires that are crimped prior to being woven together on a loom. Pre-crimping the wires provides a much higher degree of control during the weaving process. This allows for far more intricate and interesting patterns, as well as unique customization, to meet the vision of the designer. Banker Wire has refined and innovated its crimping process more than any other manufacturer, delivering more than 8,000 different spacing, diameter, and crimp combinations, plus endless customization options. As a result, Banker can make any woven wire mesh pattern imaginable – manufactured to specify for any project type.
