

RED AND WHITE CLUB UNIVERSITY OF CALGARY

Bar Cladding
Calgary, Alberta, Canada

L-441

*Shown below in brass
standard mill finish*

The newly renovated Red and White Club overlooks the McMahon Stadium football field at the University of Calgary in Alberta, Canada. This stunning club area has the ability to host up to 900 people or be separating into smaller capacity room set-ups to accommodate a variety of purposes.

Banker Wire's L-441 in bronze was used as cladding on both bar areas in the Red and White Club. In diamond-orientation, the brass L-441 adds a unique, warm flair to the otherwise cool-toned design of the club. L-441 is a small-scale lock crimp pattern that can be woven in a wide variety of alloys. Its larger percent open area allows for the wood of the bar to peek through the openings.
