

HIDE AT 85 PICADILLY

Elevator Cladding
London, United Kingdom

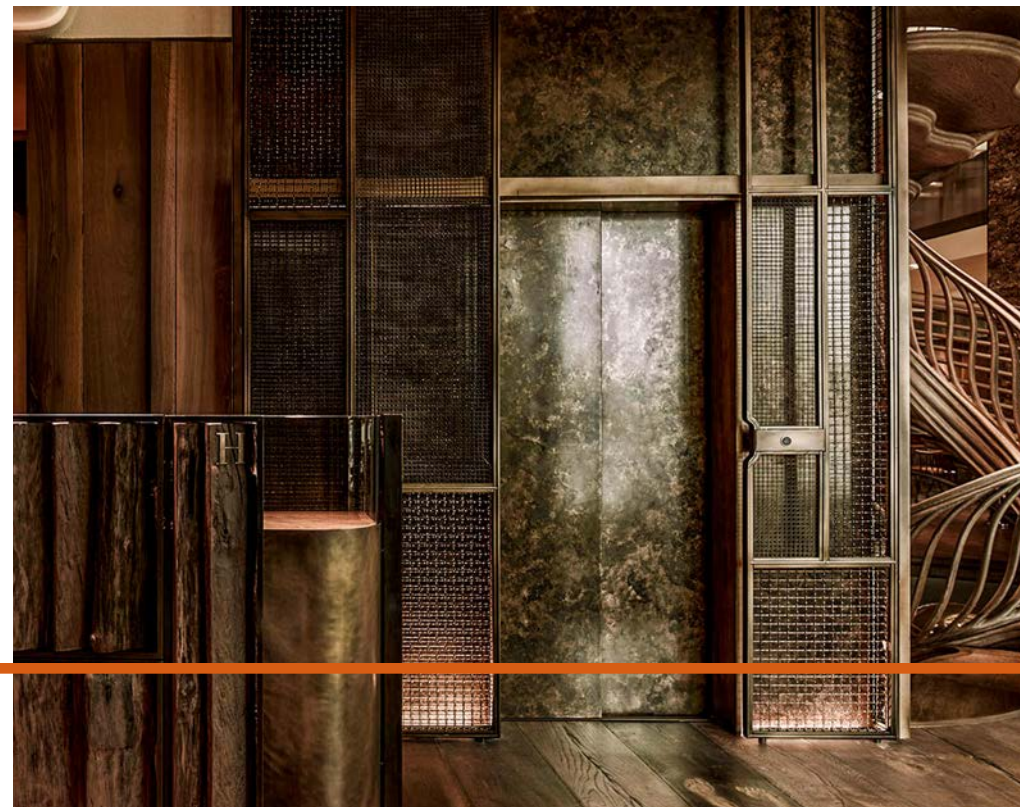

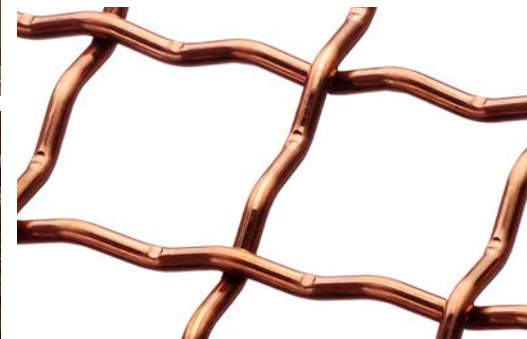

M22-28

*Shown below in bronze,
standard mill finish*

I-188

*Shown below in copper,
standard mill finish*

Hide at 85 Picadilly in London is a startlingly unique restaurant set over three floors overlooking Green Park. The restaurant and bar, by Hedonism Wines and Ollie Dabbous, offers up a refined yet relaxed setting. Neutral colors, modern décor, and natural elements create a striking environment for patrons.

Situated next to a grand stair case reminiscent of a nautilus shell, the elevator exterior adds a distinct focal point to the spacious dining room. Two of Banker Wire's woven wire mesh patterns, antique brass plated, M22-28 and I-188 were used to create the artistic and textured effect cladding the elevator. M22-28 is a small-scale twin wire intercrimp pattern, and I-188 is a large single wire intercrimp pattern.
