

CLUB REGENT EVENT CENTRE

Modular Interior Railing
Winnipeg, Manitoba, Canada

S-9

Club Regent's Event Center in Winnipeg, Manitoba is a state-of-the-art facility that brings the essence of Las Vegas to Canada. A hydraulic seating system re-arranges the Event Centre into an unlimited number of seating and floor configurations with just the push of a button. The casino adjacent to the Event Centre evokes a tropical jungle - with vibrant flowers and a walk-through saltwater aquarium. Number Ten Architecture, the architects of the Event Centre, wanted a design that complemented that aesthetic, while also providing design flexibility to suit the many events the Club Regent hosts. Those goals led them to Banker Wire's S-9 metal fabric, which they used as infill for the space's railings. The railings are modular, able to be removed or added as necessary to complement the Event Centre's configuration.

"Banker Wire S-9 mesh was selected because the designer felt that it resembled raindrops in a tropical jungle," says Christina Rieger, of distributor Rieger Architectural Products. "The design team is very happy with the outcome of this project. As always, Banker Wire provided excellent customer service throughout the installation."
