

# PACIFIC COAST RESIDENCE

Application Description  
City (If Available), State (Spelled Out) USA

**S-15**

Situated high upon a bluff overlooking the beautiful southern Oregon Pacific coast, this Port Orford residence enjoys a view that inspires. The stairs and loft balcony railing were designed to showcase a distressed metal look that emulates the wind and sea battered landscape that is unique to this coastal living environment.

Stainless steel S-15 flat wire mesh pattern was framed using an angle and bar frame assembly. Mill scale was intentionally left on the hot rolled angle and preserved using a clear coat powder coating. The upper loft area was designed with panels that could easily be lowered out of the way so that the ocean view could be enjoyed all year long.
