

RHYTHM APARTMENTS LOBBY

Interior Space Divider
Milwaukee, Wisconsin USA

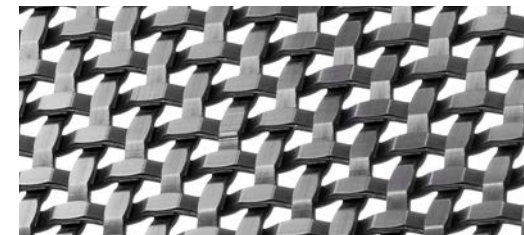

M22-22

M33-5

S-12

Various panels of Banker Wire woven wire mesh were used to help create a sense of intimacy in what was a large, open lobby area. Copper plated panels of M22-22, M33-5, and S-12 are carefully arranged to partition off the seating areas while still allowing tenants and guests uninterrupted sight lines in the lobby. The decorative mesh plays beautifully off the striking colors of the furniture and the modern edge of the building design.
