

SUBARU AUTO SHOW

Trade Show Backdrop
Los Angeles, California USA

M13Z-145

Banker M13Z-145 wire mesh was used as the backdrop at the 2010 Los Angeles Auto Show to promote the new 2011 Subaru models. These pictures clearly display how the rigid cable style mesh can be used to show long linear direction due to the wide and narrow aspect ratios.

Banker Wire woven wire mesh can create a look of both modern and classic. With such a wide range of configurations, woven wire mesh is sure to keep providing designers with options to enhance their creative vision.
