

UW MADISON, PYLE CENTER

Exterior Railing
Madison, Wisconsin USA

M22-22

The Banker Wire Versatile Spine infill panel system was chosen for this rooftop terrace application. The location overlooks beautiful Lake Mendota and is used for outdoor receptions as well as post conference social gatherings. The space is created and defined by the Banker Wire M22-22 stainless steel wire mesh framed in the thin Versatile Spine. The V-Spine frames also act as visual screening of the necessary rooftop mechanicals.
